**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

us-docketing@qualcomm.com

kascanla@qualcomm.com

nanm@qualcomm.com

***Response to Arguments***

1. Applicant's arguments have been fully considered but they are not persuasive. The applicant argues the combination of Linskog and Scherzer does not teach assigning multiple codes to the same mobile station or multiple channels. The combination teaches allocating a first code to a subscriber station and assigning a subcode of that first code dependent upon the request made by the mobile. Depending upon open codes a second subcode derived from the first code can be allocated to use the resources efficiently as described in Linskog when talking of allocating resources. The combination shows that multiple subscriber would use multiple codes as would be obvious to one of ordinary skill in the art. The channel resource handler as taught by Linskog, allocates code in response to received channel requests. It would have been obvious to one of ordinary skill in the art that a second request from a subscriber station would be treated as a second channel request and the handler would respond as disclosed. Dependent upon the resources available as stated above, the sub-code assigned could be a derivative of the first code and be assigned to the second channel to the first subscriber station. The combination discloses the claimed subject matter as would be obvious to one of ordinary skill in the art when presented with the applied references to make the obvious combination of multiple subscriber stations being managed when allocating resources to the station.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERIC ELCENKO whose telephone number is (571)272-8066. The examiner can normally be reached on M-F 7:30 AM through 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alexander Eisen can be reached on (571) 272-7687. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
